Senior Software Engineer building scalable products and REST APIs

About Me

Senior Software Engineer at **Intuit** with **10+ years** in the industry. Based in **Brazil**, I collaborate with **distributed teams** worldwide on product development and **REST API** architecture—shipping reliable software that matters to users and the business.

My career spans **startups, SaaS, and enterprise**, where I've helped design and evolve systems, modernize applications, and raise engineering quality. I combine deep hands-on work with experience in technology leadership and entrepreneurship.

Strong experience with: Ruby on Rails , REST APIs , PostgreSQL & MySQL , JavaScript / React / Vue.js , Cloud (AWS, DigitalOcean, Heroku), Docker , Git & Agile workflows, and fullstack web development .

I enjoy complex technical problems, improving developer experience, and clear, maintainable architecture.

Experience

Intuit

Senior Software Engineer

May 2025 — Present · Mountain View, California (Remote)

QuickBooks Online — cloud accounting and business software powered by Intuit.

- Developing scalable product features and REST APIs
- Modern software architecture and backend systems
- Collaboration with distributed engineering teams
- Product reliability and engineering best practices
- Strong knowledge of GraphQL
- Distributed systems
- AI-driven projects

- Solid PostgreSQL patterns and deep understanding
- Third-party integrations
- Driving key engineering initiatives

GoCo.io

Software Engineer

Apr 2022 — May 2025 · Houston, Texas
(Remote)

HR management software for people operations, payroll, and benefits.

- Strong, solid Ruby on Rails API monolith
- GraphQL and REST APIs
- PostgreSQL
- Principal driver for key initiatives
- Third-party integrations

Tech Telecom

Founding Principal

Jul 2016 — May 2024 · Goiás, Brazil (hybrid)

Startup focused on mobile phone management through software solutions.

- Software architecture and development
- Business operations and technical leadership
- Telecommunications management
- Client support and product evolution

Technologies: Ruby on Rails , PostgreSQL , JavaScript , jQuery , HTML/CSS , Git , DigitalOcean

ESL Sistemas

Software Engineer

Jun 2021 — Mar 2022 · São Paulo, Brazil
(remote)

Brazilian software company focused on transportation and logistics (TMS) — fleet, freight, and operations in the cloud.

- Built and maintained product features end to end on a Ruby on Rails backend and Vue.js SPA
- Implemented GraphQL in the Rails API for the frontend to query and mutate data
- Modeled data and tuned queries in PostgreSQL for reliable reads and writes
- Used Docker for consistent local and deployment environments
- Worked across the stack with a focus on clear interfaces between backend and UI

ao3

Software Engineer

Dec 2020 — Jun 2021 · São Paulo, Brazil
(remote)

Platform for Brazilian electronic fiscal documents (NF-e) and ongoing compliance with tax authority rules.

Large monolithic platform with **70k+ active users**.

- Maintenance and feature development
- Government rule updates
- Fullstack Ruby on Rails development

Technologies: Ruby on Rails , React , JavaScript , MySQL , AWS

Codeminers42

Software Engineer

Feb 2020 — Nov 2020 · Goiás, Brazil (on-site)

Brazilian software consultancy — engineers embedded with client teams to ship and maintain production systems.

Outsourced developer allocated to client projects.

Technologies: Ruby on Rails , SQL , Git , JavaScript , HTML/CSS , Heroku

Tempo Telecom

IT Manager

Apr 2013 — Feb 2015 · Goiás, Brazil (on-site)

Telecommunications company — internal IT, software delivery, and rollout of business systems.

- Led internal software development initiatives
- Managed software implementation projects
- Coordinated technology strategy and systems deployment

Technologies: COBIT , PMBOK , PostgreSQL , Ruby on Rails

Featured Projects

High-scale product surfaces and integrations

- **Focus:** Reliable backends, business rules, and integrations for complex domains

SaaS, payroll & HR platforms

- **Stack:** Ruby on Rails, PostgreSQL, REST APIs, cloud (AWS, Heroku, DigitalOcean)
- **Architecture:** API-first design, pragmatic monoliths, scalable service boundaries where it matters
- **Impact:** Platforms supporting many thousands of users; emphasis on API quality and operational stability

REST APIs & enterprise-style delivery

From startups to large engineering orgs

- **Focus:** End-to-end feature delivery, modernization, and maintainability
- **Practices:** Agile/Scrum, code review, observability-minded changes, collaboration across time zones
- **Outcome:** Systems that are easier to evolve and safer to ship

Tech Stack

Ruby on Rails · React · Vue.js · PostgreSQL · Docker · AWS · REST APIs · GitHub Actions

Certifications

- Scrum Master

Education

Universidade Estadual de Goiás

Bachelor's Degree in Information Systems

2009 — 2012

IPOG

MBA in IT Governance

2013 – 2015

Skills

Backend

Ruby on Rails , REST APIs , PostgreSQL , MySQL , MVC architecture

Frontend

JavaScript , React , Vue.js , HTML5 , CSS3

DevOps & Cloud

Docker , AWS , DigitalOcean , Heroku , Git

Methodologies

Agile , Scrum , software architecture , product engineering

Languages

Portuguese: Native or bilingual

English: Native or bilingual

Spanish: Professional working
